

DREMEL® INTRODUCES THE FASTEST AND EASIEST ACCESSORY CHANGE IN ROTARY TOOLS

The new Dremel 4200 High-Performance Rotary Tool features the patented EZ Change™ mechanism, saving time and effort when completing do-it-yourself, home improvement and craft projects

MT. PROSPECT, Ill. – December 12, 2012 — Rotary tool users will now have more time when tackling hands-on projects with the Dremel® brand's latest introduction—the Dremel 4200 High-Performance Rotary Tool with EZ Change™. Unlike other rotary tools that require a wrench to switch accessories, the Dremel 4200 has a fully integrated, patented quick-change mechanism to make accessory changes faster and easier than any other rotary tool.

“One of the biggest frustrations among rotary tool users is the time they lose while searching for a wrench when changing accessories,” said Fulvio Camarotto, Group Product Manager. “With the Dremel 4200, users can load and unload accessories more quickly and conveniently, without hunting down a wrench, so they maximize their time completing projects.”

Available in December, the Dremel 4200 is the most innovative and advanced rotary tool in the market. Its quick-change mechanism is seamlessly integrated into the tool design, and by pulling back on two levers at the same time users can quickly load and unload accessories. The tool offers a high-performance motor and variable speed (5,000–35,000 RPM) for accessory versatility and precise tool control, and electronic feedback automatically adjusts motor power and speed so users can tackle even the most challenging of projects with confidence. What's more, the classic pencil grip nose piece and soft 360-degree grip ensures control and comfort.

Also featured in the Dremel 4200 tool kit is the patented Dremel EZ Lock™ mandrel, for use with patented EZ Lock accessories, which allows users to instantly change cut-off wheels, polishing and abrasive buffs. Also included is the patented Dremel EZ Drum™ mandrel, which makes changing sanding bands quicker and easier without the use of a screw driver. All included Dremel accessories have a standard 1/8-inch shank size to fit directly into the EZ Change system.

The Dremel 4200 is the perfect gift this Holiday season for Ms. DIY or Mr. Fix-It. Versatile, powerful and endlessly useful, this rotary tool is the must-have addition to any toolbox. The tool comes in the highest-value rotary tool kit available, which includes six attachments and 40 genuine Dremel accessories, ensuring users can tackle nearly any application, from household repairs to hobby and craft.

The Dremel 4200 High-Performance Rotary Tool with EZ Change will be available beginning December 12, 2012 on Amazon.com, and in January 2013 at most hardware and home improvement centers nationwide for a suggested retail price of \$129.99 USD and \$149.99 CAD.
