

Dremel® Carbide Flush Cutting Blade Fact Sheet

The Dremel® Carbide Flush Cutting Blade is the first oscillating cutting blade in the market with high-performance carbide teeth that are engineered to cut through the toughest materials.

Performance

- The Carbide Flush Cutting Blade features carbide teeth that allow users to not only perform the same applications as the traditional flush cut blade but also to cut through the most difficult surfaces.

Versatility

- The blade cuts a variety of materials and surfaces, saving time by not having to switch or replace blades.
- Designed with the new Universal Quick-Fit™ System, the blade is compatible with nearly every oscillating tool on the market.

Applications

- Cuts the toughest materials including: Hardwoods, hardened metals, nails, screws, stainless steel bolts, galvanized pipe, plaster and lathe, cement board, fiberboard, sheet metal, slate and ceramic tile.

Catalog number: MM485

The Carbide Flush Cutting Blade will be available beginning April 14 in most hardware and home improvement centers nationwide for an MSRP of \$19.99.
