**DREMEL[®] INTRODUCES NEXT GENERATION CORDLESS ROTARY TOOL,
THE DREMEL 8200**

Highest Performance Cordless Rotary Tool Available 'Does It All, Unplugged.'[™]

MOUNT PROSPECT, Ill., April 6, 2010 – This spring, the Dremel[®] brand is unplugging high-performance corded rotary tool technology and, for the first time, making it portable in the new Dremel 8200 cordless rotary tool. The tool combines the best of both worlds – the performance of a corded tool and the convenience and flexibility of a cordless tool – making it ideal for outdoor or on-the-go projects that require cutting, sanding, grinding, carving, engraving, routing, cleaning, polishing and more.

“As the market leader in rotary tools, the Dremel brand wants to deliver the high level of performance our users have come to rely on in a corded tool, but in a cordless package that gives them the freedom and range needed to complete any do-it-yourself, woodworking or hobby project,” said Brian Benes, Dremel product manager. “Thanks to continued innovations in technology and insightful feedback from Dremel enthusiasts, we believe the Dremel 8200 is unlike any other cordless rotary available – it’s better.”

Versatility

The Dremel 8200 features a variable speed range of 5,000 to 30,000 rotations per minute and is the only cordless Dremel rotary tool compatible with all Dremel accessories and attachments, including the high-performance MultiSaw and Planer attachments. In addition, an enhanced design with 360-degree grip zone with soft grip enables added comfort and stability. A separate on/off switch, which retains speed settings for ease of use, and sliding speed-switch were strategically placed so as not to interfere with the grip. The sliding speed-switch features easy-to-read speed markings for accurate settings. An innovative shaft lock mechanism lets users lock the output shaft quickly when changing accessories.

Performance

The Dremel 8200 is the highest performance cordless rotary tool available, featuring a new, high-performance motor that facilitates maximum performance at all speeds.

Dremel 8200/Page 2

By combining this motor with the 12V^{MAX} Lithium-Ion[™] battery, the 8200 has a speed-of-cut that is two times faster than the leading cordless rotary tool. A new, one-hour charger is the fastest charger ever offered by Dremel and provides less downtime between projects and more time using the tool to complete them.

Portability

The Dremel 8200 does it all, unplugged. Providing corded performance in a cordless package, users are able to complete projects in the places they find most convenient, whether it be a workroom, garage or the backyard. A battery fuel gauge on the tool allows users to keep track of battery life remaining before a charge is needed.

The Dremel 8200 will be available beginning in April 2010 at most hardware stores and home improvement centers nationwide. The Dremel 8200 comes with a two-year warranty and will retail for a suggested retail price range from \$99 to \$139 USD. In Canada, the Dremel 8200 kits will retail for a suggested retail range from \$129 to \$169 CAD.

About Dremel

Since inventing the high-speed rotary tool more than 75 years ago, Dremel has become the trusted name in high-speed rotary tool technology, providing creative solutions for hands-on professionals, homeowners, craftspeople and artists alike. The Dremel brand's leadership in design and manufacturing has made it the top selling rotary tool in the world, a reflection of the company's commitment to innovation and quality.

Today, as a wholly owned subsidiary of the Robert Bosch Tool Corporation in Mount Prospect, Ill., Dremel continues to build upon this legacy with a full line of high-performance rotary tools and rotary tool attachments and accessories, specialty tools and an oscillating tool and oscillating accessories, delivering the perfect solution for almost any job. Regardless of what the task may be, users quickly realize they can depend on the Dremel brand to provide the satisfaction of a job well done.
